Agility on Demand

Source Code Management

GitHub • Azure Cloud Hosted • Government Compliant

Challenge: Government agencies require a code collaboration tool that enable them to fully optimize their agile teams and meet the OMB data.gov and the Federal Source Code Policy.

Solution: TechTrend's GitHub Enterprise SaaS offering is built on the FedRAMP approved Azure GovCloud and provides eAuth/PIV authentication.

Result: The GitHub SaaS offering enables agencies to meet the mandates and build applications more efficiently and cost effectively by easily sharing work, discussing changes, and obtaining feedback all in one place, including: code commits, issue logs, even individual code files.

GitHub

GitHub provides the organization real-time insight into its development projects.

Azure

Microsoft Azure is a trusted government cloud offering with 50+ compliance offerings.

TechTrend

TcL

TechTrend's offering is built for government with ATO, custom integration and government know-how support services.
